- Able to drive external display up to 4K resolution

ONE COMMON KERNEL.
ONE INTEGRATION.
MULTIPLE ENVIRONMENTS.

The NEO 3 Platform of Products has sleek designs and new unattended retail technology that raises the bar for unattended payments. The NEO 3 platform directly meets the needs of businesses to quickly certify their payment devices. Thanks to ID TECH's L2 common kernel, businesses certifying one product on the NEO 3 platform can adopt all six products without having to recertify the others.

EMV COMMON KERNEL

ID TECH simplifies and accelerates EMV Level 3 certifications by implementing a common EMV Contact Kernel across all EMV capable solutions. Certifying one device means immediate certification of the entire family of products!
