

REMOTE KEY INJECTION (RKI)

Remote Key Injection (RKI) allows you to quickly and securely load cryptographic keys on a payment solution remotely through the cloud, using factory certificates. This eliminates the need for you to ship your terminals to a Key Injection Facility (KIF) - saving you valuable time and resources. RKI offers a fast and secure method to setting your hardware up for the online verification process of a customer's PIN.

RKI BENEFITS

- Deploy Key Injections Anytime, Anywhere
- Faster and More Secure
- Inject Multiple Keys in a Single Session
- Instant, Real-Time Update Service on Terminals
- Eliminate Costs Associated with:
 - Key Management Process
 - Re-Certifications
 - Secure Rooms
 - Shipment of Terminals
 - Specialized Personnel

RKI PROCESS

Log onto the online portal from your computer, laptop, tablet, or mobile phone

Select terminal(s) to request a unique key from the payment processor

Encryption Key
Injected into Device

Request Made

Encryption key provided by payment processor

Value through Innovation

ID TECH, a global leader in payment technology, offers a wide range of products including MagStripe readers/writers, mobile payment readers, contactless readers, smart card readers, barcode readers, POS keyboards, signature capture devices, PCI-compliant PIN pads, and more. With sales, manufacturing, and R&D facilities worldwide, ID TECH delivers dependable, feature-rich solutions tailored to customer needs.
