MISSION STATEMENT

We are the trusted partner building integrated payment solutions to simplify the most demanding applications around the world.

ABOUT ID TECH

ID TECH is a world-recognized leader in the design and manufacture of payment solutions, ranging from state-of-the-art contactless/NFC payment devices to EMV and Magstripe readers. For more than 30 years, ID TECH has built a reputation based on technical excellence, innovation, and a commitment to superior customer service and are industry leaders in delivering payment solutions across the globe. We are also an OEM payment solutions provider with the capability and willingness to customize solutions to fit our customers' needs.

ID TECH's product family delivers industry leading NFC technology such as Apple Pay, Google Pay, Samsung Pay, and global card brand acceptance across multiple verticals and applications. As the pioneer of NFC payments, ID TECH's solutions are always at the forefront of the latest NFC technology and enables both payment and loyalty to merchants. Known for our reliable hardware, our business has expanded to also include software services and merchant services.

YOUR PAYMENT SOLUTIONS PROVIDER

Headquartered in Cypress, California (with additional engineering centers in Rocklin, California; Shanghai, China; and Taoyuan City, Taiwan), ID TECH meets the highest standards when delivering quality payment solutions across the globe.

ISO 9001 Certified   /   ISO 14001 Certified

THE ID TECH ADVANTAGE

EMV COMMON KERNEL & CONTACTLESS FAMILY

For simplified EMV certification, all of ID TECH's EMV devices (from countertop to unattended to mobile to OEM) employ a common kernel strategy. By sharing the same common kernel, one EMV L2 certification can be applied to all relevant ID TECH EMV products, allowing for immediate expansion into other verticals - certifying one device means immediate certification of the entire family of products!
